Work Authorization: Requires employer-sponsored work visa

Professional Summary

Frontend Engineer with 4+ years of experience building and delivering web applications, with strong expertise in React, Next.js, TypeScript, and modern frontend technologies. Experienced in developing complex admin panels, trading dashboards, multilingual applications, and customer-facing web platforms, from requirements analysis and frontend architecture to implementation and delivery.

Worked independently as a freelancer and remotely with international teams, including a Germany-based team, taking ownership of projects throughout the development lifecycle. Experienced in REST APIs, authentication, state management, performance optimization, responsive UI development, and translating Figma designs into maintainable, scalable interfaces.

Technical Skills

Core: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frontend: React, Next.js, React Router, Redux Toolkit, Zustand, TanStack Query (React Query), Context API

UI & Styling: Tailwind CSS, Ant Design, Material UI, shadcn/ui, Framer Motion

Data Visualization: Recharts, ApexCharts

API & Authentication: REST API, GraphQL, Axios, JWT Authentication, Cookie-based Authentication

Currently Learning: Node.js, Express.js, MongoDB

AI-Assisted Development: GitHub Copilot, Cursor, ChatGPT, Claude — technical research, debugging, code analysis, and exploring alternative solutions

Work Experience

Frontend Developer | Habibi Hello — Germany (Remote)

Nov 2022 – Jun 2023

Designed and developed a multi-tenant e-commerce administration platform, enabling merchants to manage products, orders, store settings, and dedicated storefronts through custom subdomains.

Built a scalable, component-based frontend architecture using **React**, **Next.js**, and **TypeScript**.

Developed responsive, mobile-first interfaces using **Tailwind CSS**, focusing on usability across different screen sizes.

Integrated frontend applications with backend services and REST APIs using **Axios**.

Collaborated remotely with a Germany-based team on a daily basis and consistently delivered assigned features within project timelines.

Frontend Developer | Rojin Tak — Industrial & Agricultural Company

Dec 2023 – Present

Designed and developed administrative and employee management panels used for internal business operations.

Translated **Figma designs and business requirements** into maintainable frontend implementations.

Improved page performance and responsiveness across different devices and screen sizes.

Managed frontend development independently, communicated directly with stakeholders, prioritized requirements, and delivered features according to project needs.

Frontend Developer | Iran Brand Academy

Jul 2023 – Nov 2023

Designed and developed a multilingual administration platform supporting Persian, Arabic, English, and Chinese.

Implemented support for both RTL and LTR layouts across the application.

Developed product management and sales configuration features for the administration platform.

Built reusable interfaces and components to support multiple languages and different content directions.

Freelance Frontend Developer | Domestic & International Clients

2021 – Present

Delivered frontend projects independently, from requirements gathering and implementation to testing and final delivery.

Translated Figma designs into responsive, maintainable, and scalable web interfaces.

Communicated directly with clients to clarify requirements, manage priorities, and coordinate project delivery.

Handled the complete frontend development lifecycle without a dedicated technical team, including implementation, debugging, optimization, and deployment support.

Improved website performance and responsiveness across different devices and screen sizes.

Selected Projects

[Robinwood](#) – Trading Prop-Firm Platform

React, TypeScript, Tailwind CSS · [\[Live Demo\]](#)

Designed and developed the frontend for a trading prop-firm sales platform using React and TypeScript.

Built user dashboards, trading-related data visualizations, and responsive interfaces.

Integrated the application with backend APIs and continue to develop and improve the platform.

Misca – Digital Menu Platform

Next.js, Tailwind CSS, SWR

Developed a digital menu platform for cafés and restaurants using Next.js.

Implemented menu management and customer-facing menu display features.

Integrated the frontend with backend APIs using SWR for data fetching and state synchronization.

Almas Vista – E-commerce Platform

Rebuilt and modernized the frontend of an e-commerce platform using Next.js.

Refactored and migrated the existing implementation to a modern Next.js architecture.

Source code is private due to client confidentiality.

Rojin Tak – Administration & Employee Management Platform

React, Tailwind CSS, Ant Design

Designed and developed administrative and employee management interfaces.

Translated Figma designs into responsive and maintainable React components.

Optimized the frontend experience across different devices and screen sizes.

Worked directly with the client to prioritize requirements and deliver ongoing improvement

Tipax–Logistics Management Portal

React, Ant Design

Developed a dedicated user management portal for a logistics company.

Project details are not publicly disclosed due to client confidentiality and can be discussed during an interview

Atrin Kala – Website Development & Integration

HTML5, CSS3, Tailwind CSS, JavaScript

Developed and improved the website's frontend interface.

Implemented responsive UI improvements and integrated frontend components into the existing website.

Education

Associate Degree in Accounting

Islamic Azad University, Iran

Languages

Persian: Native

English: Conversational – actively improving, with a focus on technical communication and job interviews
